INTRODUCTION

SHORT DESCRIPTION

Extent is an ERC20 standard token based on the Ethereum network. The Extent project is a multifunctional platform for token creators and their future investors. Extent can benefit both sides - for creators, in extending the number of their project's potential investors, while the Extent token holders can gain access to free automated airdrops.

Extent has short-term and long-term goals presented as Phases:

1st Phase - Extent as an airdrop platform

2nd phase - Extent as "Blockchain Incubator"

TECHNICAL SPECIFICATIONS

Symbol: EXT

Decimals: 0

Total Supply: 100,000,000 EXT

[0x670699ada430bd6eb3ce761f8307c52c396add05](https://www.etherbase.io/etherscan/address/0x670699ada430bd6eb3ce761f8307c52c396add05)

EXTENT AS AN AIRDROP PLATFORM

In the beginning, the Extent project will make an accent on making partners - service providers: advisors, PR managers, legal consultants, exchanges, etc. As the number of partners will grow, everyone in the team will be requested to help grow and promote each other's services.

New tokens and ICOs will be able to make an airdrop on Extent's platform in an efficient way. Besides the money and time saving, they will get our partner's services for free or with exclusive discounts. Projects will be announced on social media, articles will be published and PR campaigns will be started.

EXTENT AS “BLOCKCHAIN INCUBATOR”

As we gain popularity and connect with partners, Extent will transform to “Blockchain Incubator”, without losing 1st Phase abilities and services. Blockchain Incubator will be a helping hand for worthy ideas to get developed. There are plenty of important ideas that can’t be created because they lack of financial support or technical knowledge. We will help them with every aspect, from writing project to making a successful project.

EXTENT WILL:

- become a landmark for token Creators.
- be the conduit between Remarkable Blockchain Projects and Potential Investors.
- help people to transform a Business Idea in reality.
- create value through an economic ecosystem based on Ext hodler’s community.

EXTENT’S PILLARS: FAIRNESS, TECHNOLOGY, SIMPLICITY

Extent’s 3 pillars are Simplicity, Fairness, Technology. Over these cornerstones, Extent’s team will build up strategy to make EXT token used and loved by all the parties involved, including token creators, airdrop participants, investors, exchanges, attorneys, marketers and other service providers.

FAIRNESS

EXT token will NOT have an ICO. Every person will be able to claim tokens for free, without any limits or restrictions.

In the first phase of the project, EXT hodlers will receive benefits in form of airdrops of other tokens that will use the platform to market their project in a costless and efficient way.

Over time Extent will become precious and scarce due to a huge demand created by offering all-in-one services for token creators on the platform.

TECHNOLOGY

Extent is built above Ethereum Blockchain with ERC-20 contract.

EXT token will use smart contracts at it’s full power.

Extent embraces all the best “Blockchain” technology has to offer.

SIMPLICITY

Extent’s platform will be easy to use for both parties - Creators and Hodlers.

Extent’s team will be easy to reach, supportive and responsive.

Extent’s project will follow a solid roadmap.

Extent is agile by nature: team will use all the modern technologies to operate in a cost efficient way, still make a full use of it.

USE CASES

FOR THE 1ST PHASE

Extent will be used to create custom and cost efficient airdrops over the platform. Airdrops will be distributed proportionally for EXT hodlers. Creators will get perks of our partners’ services, while Extent hodlers will be rewarded with new tokens proportionally. More tokens you hold, more airdropped tokens you will get.

FOR THE 2ND PHASE

Extent as “Blockchain Incubator” will support and give* financial and technical aid (help) to worthy ideas to thrive with success. Extent will focus on supporting new projects to succeed. Providing projects with full support including PR, legal and ICO services.

Use case of EXT token - All of the services will be paid with EXT.

*If needed.

	Hodler	Creator
Airdrop platform	Access to automated and simple airdrops in a secure way	Distribute airdrops to Extent's huge community to reach potential investors + get perks from our partners
Blockchain Incubator	First hand access to new technologies developed through Extent Incubator	Bring a Business Idea to market using advanced services from our partners

AIRDROPS

Doing airdrops on Extent's platform gives many benefits to token creators, including access to a huge number of targeted people and potential investors, plus our partner's numerous and limited* offers.

*Limited access to tokens, airdropped on Extent's platform.

EXTENT AIRDROPS: A MARKET OPPORTUNITY

Airdrops are a fundamental marketing part of every ICO, blockchain project.

They are loved by community - it allows people to get to know a project and invest in it.

TRADITIONAL AIRDROPS: PROBLEMS

FOR CREATORS:

High fees for token distribution

Costly marketing campaigns*

Tokens distribution is a time-consuming activity

Low quality community

FOR HODLERS:

Participation in airdrops need a lot of precious time to be spent on

Some airdrops are not legit

Airdrops require the user's personal data (email, social accounts, KYC)

Extent will solve all the problems related to the airdrops in simple, yet cost effective way.

Airdrops will be great again for both, creators and hodlers.

*Money should be spent on:

1. Listing on Airdrops/ICO websites
2. Advertising on the media
3. Publishing articles
4. Distributing tokens (transaction expenses)

SOLUTION:

Extent Airdrop Framework will redefine the whole process of airdropping tokens:

- Extent will advertise remarkable projects at almost no costs
- Extent will do due diligence on the Creators

- Extent will protect user's data
- Extent will expose only good projects to it's community
- Extent will reward EXT token hodlers with new token's airdrops

OFFERS AND PRODUCTS

MARKETING SERVICES

Extent will offer a wide range of Content Marketing Services aimed at promoting honorable projects. Including social media PR, article publications, community promos, ICO/Airdrop channel listing, etc.

EXTENT WALLET

Extent Wallet will be a secure way to store and track ERC20 tokens as well as incoming airdrops on Extent platform.

BLOCKCHAIN INCUBATOR

At the last Phase of Extent's development, we will transform to fully working Blockchain Incubator with various services for worthy blockchain project ideas. As an incubator we will offer services including but not limited to:

- Mentoring
- Legal Advisory
- Technical Advisory
- Marketing Advisory

In simple words, Extent will bring ideas to life and make them thrive.

COMMUNITY

Extent project was born in July, 2018 with the growing community day-by-day, with the record of 3200 Twitter followers in a day.

It's important to mention that every single member of the community is 100% real and targeted people in the blockchain industry.

Extent is a place where everyone has a good reason to stay on board.

PARTNERS

Want to be on board? Contact: partnership@extent.space

ROADMAP (DATES TBA)

ONE TIME

Token distribution

Listing on 1st exchange

Airdropping 1st token on Extent's platform

Building dedicated web based platform

Building Extent Wallet

REOCCURRING

Listing on exchanges

Partnering with exchanges

Partnering with media

Partnering with blockchain projects

Inviting advisors, attroys, pr managers, bounty managers, etc

Airdropping tokens on Extent's platform

CONCLUSIONS

In the near future Extent will have an incredible community and be a new standard for the airdrops.

Subsequently, new products and services will start developing on the platform. Various services and products to be offered to Extent hodlers and token creators, including all new ERC-20 wallet, online service marketplace and a fully working Blockchain Business Incubator.
